EXPERIENCE

Pressing reklame, Printing Industry

Jun 2016 - Present

Co-Owner & CEO

Kragujevac, RS

- Orchestrated end-to-end management of promotional materials, from negotiating contracts to overseeing design, print production, and final delivery, resulting in a 20% reduction in production time and a 15% increase in cost savings.
- Created logos, designed business cards, brochures, and provided interior and exterior space design with graphic solutions and increased traffic by 150% within 8 years with 1.5 milion to 3.75 milion dinars
 - Advanced crafting skills production process by implementation robust training program that team competence is improved; training led to a huge reduction of production errors and increased output quality.
 - Also, with the successfully completed training, I enabled the servicing of machines independently without compensation costs, where the consumption for service technicians was reduced by over 50%
 - Successfully conducted practical teaching for lower grades from Kragujevac from the **First Technical School** in the same direction with support former class teacher and taught them practical work on all digital printing machines
- Handled bookkeeping, electronic bill payments through Office Banking application, maintained e-invoices, and worked with point-of-sale software in the Allegra program.

Politek d.o.o. , The trucking industry

Jun 2021 - Jul 2022

Head of maintenance of a part of the truck

- Head of maintenance, installation, management of the warehouse department for capsules, spoilers and windows of new truck upgrades and increase productivity by 25%

EDUCATION, CERTIFICATION & PRACTICE

HIMERA, IT Academy

October 2023 - Jun 2024

Web & JavaScript / React & Redux, Node.js, Typescript

- I would highlight the knowledge and work with functional and class components that we used when creating applications in a couple of projects. To navigate both old and new ways of writing components and to be ready for any type of code writing depending on the company they were using. In addition to knowledge in React I would also highlight the final project that we did at the end of the course, which you can view at my **GitHub**
 - The final project, we did at the end of the course is a TRELLO-CLONE-APPLICATION in **TypeScript** programming language. Many people call this programming language JavaScript with superpowers. The background of this language is pure JavaScript, but with TypeScript the code is more maintainable, even though there are more lines of code than JS. Also, in TS we can immediately see the error through the terminal, while in JS it is only possible in the browser, which additionally saves time and we notice errors earlier.
 - On my website, there is also a live application **To do**, which was also developed in this course and which is among the first serious applications that we worked on. This application used class components and a project in which we installed and used the **MDBReact library** in addition to the classic **React library**.

OTHER

- **Technical skills:** Html, CSS, JavaScript, React, TypeScript, Agile methodology, Basics of manual testing, Figma, CorelDraw, Adobe Photoshop, Adobe Illustrator
- **Personal skills:** During 15 years of working in the printing industry and working as a designer, **I have built up a very successful observation of details** where the problem is sometimes even in one letter and where you must not make a spelling mistake which are also very important for programming. Also proven to be **very curious about various types of technology**.
